## **Our Web-based “Office Ergonomics” course reduces the cost of training employees.**

Dear Valued Client,

EWI Works, in collaboration with Solocks.Com, has developed an online office ergonomics course for employees to keep the delivery of a solid, results-based ergonomic program more cost effective. Ergonomic training educates both new employees and seasoned staff to create awareness and reinforcement of ergonomic principles and how to apply them in a daily work routine. Until now, sessions involved having an ergonomist brought onsite to instruct employees who need to be scheduled away from their duties to take the course for one to two days. With EWI Works’ new interactive Web-based course, **we have made the training stage of implementing your ergonomic program worry-free and economically feasible.**

The advantages of EWI Works’ online “Office Ergonomics” course to your organization are:

- ↳ Employees conveniently complete the course at their own individual workstation, at their own pace.
- ↳ The course is available to the user for one year of unlimited use.
- ↳ The need to have a certified ergonomist teach the course at your site is no longer necessary; therefore there are no instructor fees or travel charges incurred for training staff.
- ↳ Most importantly, the cost of lost production time is decreased as the need to remove large groups of staff from operational duties is eliminated.

EWI Works’ Office Ergonomics Online Training Program is available now. If you would like more information or would like to try a demonstration of the course, please contact us at (780) 436-0024 or by email at [info@ewiworks.com](mailto:info@ewiworks.com).

Sincerely,

Linda Miller, CCPE, CPE  
President, EWI Works

EWI Works is committed to working together with your organization to provide the most appropriate ergonomic intervention program that meets your needs.
